

SPM DF8

Construction

Plaited ropes of the BEXCOLINE range are well established in marine and off-shore applications, because of their ease in handling and non-rotating behaviour. They are produced on a plaiting machine containing eight reels, each containing one strand, groups of two reels interweave as a pair around the other pairs of reels to produce an eight strands rope of a somewhat square cross section.

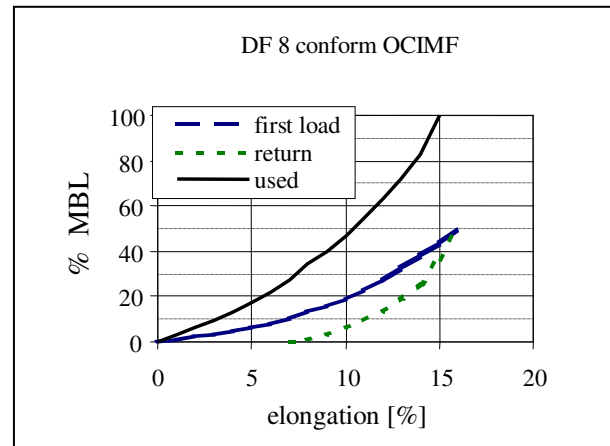

Material Properties

DF8 is a mixed or composite fibre based on our proprietary BEX- yarn and polyester as a strength member. It combines the excellent fatigue characteristics and abrasion resistance of polyester with the low density of Bexcord. The fatigue life is comparable to pure polyester, but the weight for a given strength is comparable to that of nylon, giving the rope excellent handling characteristics. A special marine finish is applied to further increase the wear resistance in a marine environment. This finish has been tested conform ASTM D6611-00 and is water repellent. Wet and dry strength is identical.

Features

➤	Materials	High tenacity BEX-yarn and high tenacity polyester
➤	Construction	8 strand plaited
➤	Treatment	Marine finish
➤	Colour of Rope	White with a two colour marker,(orange and blue) in one strand
➤	Approx. Spec. Density	1,14 non-floating
➤	Melting point	165°C / 260°C
➤	Abrasion Resistance	Excellent
➤	U.V. resistance	Good
➤	Temperature resistance	70°C max continuous
➤	Chemical resistance	Good, solvents and strong oxidisers may have a mild effect
➤	Dry & wet conditions	Wet strength equals dry strength
➤	DF 8 Single Point Mooring Hawsers are manufactured in accordance with OCIMF 2000 regulations	
➤	Break Load and length according to OCIMF	
➤	Weight	± 5%
➤	Diameter	± 2%
